

CENTER FOR THREAT-INFORMED DEFENSE: BENEFACTOR PROGRAM

The Benefactor Program enables the global community to advance critical, public interest, cybersecurity programs through charitable giving. Benefactor contributions fuel the foundational programs and resources that enable threat-informed defense. Benefactors are globally recognized for supporting independent research in the public interest.

Benefactors make a positive impact by directly funding threat-informed defense programs

MITRE | ATT&CK[®]

ATT&CK is a freely available, community-driven knowledge base of adversary TTPs curated by MITRE. It is used globally to advance our shared understanding of adversary TTPs and empower defenders. ATT&CK shifts cyber defense to be behavior-based, supporting communication across teams, and enabling the community to get ahead of the adversary. Benefactors sustain and advance ATT&CK through their financial contributions, ensuring that the knowledge base evolves as cyber attackers evolve and our IT environment changes.

MITRE | Caldera[™]

Caldera is the world's leading open-source, scalable adversary emulation platform. With the ATT&CK knowledge base as its backbone, Caldera empowers cyber practitioners to save time, money, and energy through automated adversary emulation operations, security assessments, and red-teaming. Benefactor contributions will help sustain Caldera's open-source operations and repositories and will further research and development to advance the state-of-the-art in adversary emulation.

MITRE | Engage[™]

Engage is a framework for planning and discussing adversary engagement activities. Engage maps to ATT&CK tactics and techniques to illuminate threat-informed opportunities for defensive activities. Engage enables defenders to Expose and Affect adversarial operations or to Elicit cyber threat intelligence from adversaries operating on defender-controlled networks. Overall, the technologies described in Engage drive up the costs, while driving down the value, of malicious cyber operations. Benefactor contributions will help Engage drive innovation in adversary engagement and ensure state-of-the-art guidance on the safe and effective use of these technologies is continuously available to the global cyber community.

MITRE | Center for Threat Informed Defense[™]

The Center for Threat-Informed Defense conducts public interest research to advance the shared understanding of adversary behaviors and systematically improve our collective ability to defend against those behaviors. The Center creates practical resources that are used by cybersecurity teams around the world, making cybersecurity more efficient and effective, while enabling innovation. Benefactors fund the Center's public interest research.

BENEFACTORS CAN ACCESS A SUITE OF BENEFITS DEPENDING ON LEVEL OF CONTRIBUTION

Benefits	Annual Gifts	Champion \$250k and above	Advocate \$100k - \$249,999	Friend \$50k - \$99,999	Supporter \$10k - \$49,999
Bi-annual report Benefactors will receive a bi-annual report on the overall program impact.		✓	✓	✓	✓
Announcement Announcement of new benefactors through social media post and newsletter.		✓	✓	✓	✓
Logo placement Your company logo is showcased on the selected program's website (e.g., ATT&CK, Engage, or Caldera) and Center for Threat-Informed Defense website.		✓	✓	✓	
Annual program feedback discussion Individual annual meeting with MITRE capability experts.		✓	✓		
Bi-annual webinar Invitation to bi-annual capability update webinar for the selected program.		✓	✓		
Booth presence Select complementary booth presence at MITRE / MITRE Engenuity events.		✓			
Exclusive networking receptions Invitations to exclusive receptions at special events (e.g., RSA).		✓			
Customizable Customized philanthropic programming.		✓			

MITRE is a 501(c)(3) non-profit. Donations are tax deductible.

The Benefactor Program is operated by MITRE's Center for Threat-Informed Defense.

About the Center for Threat-Informed Defense

The Center is a non-profit, privately funded research and development organization operated by The MITRE Corporation. The Center's mission is to advance the state of the art and the state of the practice in threat-informed defense globally. Comprised of participant organizations from around the globe with highly sophisticated security teams, the Center builds on MITRE ATT&CK®, an important foundation for threat-informed defense used by security teams and vendors in their enterprise security operations. Because the Center operates for the public good, outputs of its research and development are available publicly and for the benefit of all.

If you would like to be contacted about becoming a benefactor please share your contact information with us at <https://ctid.mitre.org/donate> or email us at ctid@mitre-engenuity.org.
